

AveoFlash LP Andromeda™

Coming Soon!!

C-Series Aircraft LED Lights

C-Series AveoFlash Andromeda™ aircraft lights meet both TSO C30c and C96a design specifications and EXCEED the requirements of TSO C30c, C96a, SAE AS 8037 and

S8017a, plus DO-160B.

Integrating the most technologically advanced and brightest LEDs available in the world to the amazing and exclusive AveoOptimizer™ circuitry, the Aveo C-Series lights are optimized for certified aircraft installations and especially high speed/high performance aircraft. Extremely low-profile and aerodynamic shaped AveoDiamidium™ encapsulation lenses which are optically enhanced and operable from minus 60 C. to plus 200 C. The C-series is available in two mounting systems. One marked HSLP™ for "High Speed Low Profile" and the second marked GALP™ for "General Aviation Low Profile" aircraft lighting applications.

FEATURES:

a 9-32 volt input range, no more separate lights by voltage

Aveo's new Easy-Mount installation system

no external power supply or strobe unit required, as pioneered by Aveo first in 2007

extremely light weight

minimum drag profile shaping

exclusive internal RockyReflector™ optics to far exceed the TSO requirements

and of course our industry-exclusive Aircraft Lifetime Warranty*
